

## Word Jenga Instructions

Write all the high frequency words on each block. If there are more words than blocks, you can write more than one word per block (using each of the sides of the block).

**Instructions:** Player one pulls out a block and reads the word. If read correctly, they can place it at the top, if read incorrectly, the player must put the block back.

Player two pulls a block and repeats the same steps as player one. Players continue until the tower falls over.

\*variation: Print the Build a Tower page. Every time a block is pulled out, the player must record the word on their page, then they can stack the block at the top of the tower.
